The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical

application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts. This ARP specifies the recommended methods of marking electrical wiring and harnesses to aid in the positioning/routing of electrical wiring, harnesses and cable assemblies. This SAE Aerospace Recommended Practice (ARP) provides information to the user community on the use of Harness Critical Clamp Locator Markers where there is an installation requirement to reduce electrical wiring and harness movement, provide slack in critical locations and maintain adequate clearance and separation from aircraft equipment and structure. In addition, the Harness Critical Marker alerts the wiring installer and service personnel that harnesses in the area need special attention. 11 McLain and Reynolds

(1989) reported girls track and field athletes lost 32.0 days of participation and boys lost 23.1 days due to injury. This was amongst the highest number of days lost compared to other sports such as football. The purpose of this study was to explore the use of plyometric exercises within Section 8A Minnesota high school track and field programs during the 2007 competitive season and to determine whether plyometric exercises were a contributing factor to number of days lost due to injury. Eighteen coaches in section 8A were interviewed to determine coaches' implementation of plyometric exercises during the 2007 competitive track and field season. Questions were developed by using NSCA guidelines pertaining to plyometric training. An analysis of data indicated all coaches utilized plyometric exercises which included the skip, power skip, jump over barrier, lateral barrier hop, single leg hop, and depth jumps. All coaches indicated they utilized no formal screening process to determine the physical and

emotional readiness of their athletes to perform plyometric exercises. During the 2007 competitive track and field season Sections 8A coaches reported no injuries due to plyometric training. However, coaches reported injuries from plyometric exercises prior to 2007 and had made appropriate training changes to avoid future injuries. The data indicates plyometric exercises are not the primary reason for number of days lost due to injury. 23 20 This audit was performed as a result of a congressional request. Representative Jan Meyers, Chairperson, House Committee on Small Business, received complaints that the sole-source contracts for dredging services that the Norfolk and Buffalo Districts, Army Corps of Engineers, (the Districts) awarded under the Small Business Administration Section 8(a) Program were overpriced. The complaint was also that one of the Section 8(a) contractors was not performing the dredging work with its own assets, but that the contractor was acting as a broker and

subcontracting out the work after contract award.
